whether trying to meet regulatory requirements, increase performance and productivity, or better utilize alchemy's communications platform, we provide comprehensive solutions to meet your needs. our expert consultants can save your organization valuable time while assuring projects are completed accurately and in a timely manner.

alchemy professional services
Food Safety Consulting

Changing regulatory requirements and audit standards make it challenging to ensure your food safety program is consistently meeting expectations. Our food safety consultants can develop or improve your food safety programs.

We help with USDA compliance, FDA compliance, customer/audit requirements, as well as food safety and quality management systems. Build a sustainable food safety culture with consistent audit defensible practices for:

- GFSI Certification and Re-certification Preparation
- GFSI and HACCP Onsite Training
- FSMA Preparation and Compliance
- HACCP/HARPC Development, Reassessments, and Validation

Workplace Safety Consulting

Alchemy offers workplace safety consulting to help create a safer workplace for employees, visitors and customers.

We guide your organization with OSHA compliance assessments, workers’ compensation reduction, and Injury/Illness Prevention Programs including:

**Workplace Safety Assessment**

- Safety Plan
- Injury/Illness Prevention Plan
- Workers’ Compensation Analysis
- Total Incident Rate Reduction Strategies

**OSHA Compliance Assessment**

- Safety Audit
- Health Audit
Operations Consulting

Alchemy’s Total Operational Performance System (TOPS) is a proven process that prioritizes safety, quality, yield, productivity, and culture objectives to contribute to the operational excellence of the organization. Our consultants work closely with your supervisors and front-line workers to optimize line production.

Safety
We help develop, implement, and validate safety systems to reduce the risk of recall and foodborne illness while assuring regulatory compliance.

Quality
We help create an effective plan of defined specifications and measurement systems to maintain the highest quality.

Productivity
We help drive productivity with effective line and departmental staffing efficiency, labor recovery standards, and benchmarking.

Yield
We improve profitability by increasing product yields and decreasing waste through identified yield standards and goals at each stage of production.

Culture
We help establish an employee culture in which everyone understands the importance of their role for ensuring operational excellence.
